SUMMARY

Java Backend Developer with 1.5 years of experience in building RESTful APIs using Spring Boot, JPA and Oracle DB. Experienced in microservices, authentication, API security and workflow automation. Passionate about building scalable backend systems and solving real-world problems.

TECHNICAL SKILLS

Languages: Java, C++

Frontend Tools: React.js, Tailwind CSS, npm, CDN

Backend Tools: Springboot, Hibernate, JPA, Spring MVC

Developer Tools: Kafka, VS Code, Eclipse, IntelliJ Idea, Postman, Git, GitHub

DataBases: Oracle, SQL

Operating System: Unix, Linux

WORK EXPERIENCE

SBI General

Jun 2025 – Present

Java Developer

Mumbai, India

- Developed Spring Boot REST APIs for CKYC data exchange with regulatory bodies, handling 10,000+ KYC records monthly through secure and reliable integrations.
- Automated the end-to-end CKYC submission and response-processing workflow, reducing manual intervention by 60% and improving processing efficiency.
- Implemented data validation, exception handling, logging, and response processing, improving data accuracy and reducing processing errors by 30%.
- Integrated CKYC services with 5+ internal systems/modules, enabling seamless and reliable end-to-end regulatory KYC processing.

PROJECTS

AIVADENT - A Clinical Support for Modern Dentistry 🚀

Dec 2023 – May 2024

- Built a Full-Stack dental appointment management system with React.js, Springboot as backend and Oracle as a database with supporting user authentication, booking flow, admin dashboard and payment gateway.
- Integrated a Voice Agent to enable conversational appointment scheduling and real-time assistance for patients and along with instant feedback for the users.
- Implemented payment gateway, email verification and automated invoices improving user experience and operational efficiency.

Multi-Disease Diagnosis System using Clinical Data 🚀

Jul 2024 – Dec 2024

- Developed a Multi-Disease Diagnosis System using Flask (backend) and React (frontend) to predict conditions like diabetes, heart disease, parkinson's disease and kidney disease from patient health parameters.
- Trained multiple machine learning models (such as Logistic Regression and Random Forest) using real medical datasets, and saved them as .pkl or .sav files for real-time predictions via REST APIs.
- Integrated and deployed the complete application—React frontend and Flask backend on Vercel enabling secure, fast, and accurate disease prediction accessible through a web interface.

PRACTICE PROJECTS

- Portfolio Website - Built responsive personal portfolio using React. 🚀
- Expense Tracker - Developed REST-based expense tracking backend. 🚀

EDUCATION

Sardar Patel Institute of Technology

B.Tech in Computer Engineering CGPA - 7.55

2021 – 2025

Mumbai, India

ACHIEVEMENTS & CERTIFICATIONS

- Semi-Finalist at Tata Imagination Challenge 2024. 🚀
- Developing Soft Skills and Personality. 🚀
- Ultimate AWS Certified Cloud Practitioner 🚀
- React - The Complete Guide 2025 🚀
