SUMMARY

Full Stack Developer with experience in building scalable applications and collaborative software solutions. Skilled in modern web technologies and backend frameworks, and a strong focus on problem-solving.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript

Frontend Tools: React.js, Tailwind CSS, npm, CDN

Backend Tools: Node.js, Springboot

Developer Tools: VS Code, Eclipse, IntelliJ Idea Ultimate, Power BI, Git, GitHub, Excel, Jupyter Notebook

DataBases: Oracle, MongoDB

WORK EXPERIENCE

SBI General

Jun 2025 – Present

Java Developer

Mumbai, India

- Architected and deployed enterprise-grade Spring Boot REST APIs integrating with government entities, with 99.8% uptime, implementing advance authentication system, AES-256 encryption, and comprehensive input validation that reduced security vulnerabilities by 100% during penetration testing.
- Engineered end-to-end workflow automation that eliminated 40+ hours of weekly manual processing, achieving 95% reduction in human errors and improving submission accuracy from 87% to 99.2%.
- Orchestrated 4+ production releases over 7 months with zero critical incidents, managing complete SDLC including deployment planning, staging validations, blue-green rollouts, and 24/7 monitoring.
- Executed comprehensive UAT initiatives by designing 150+ test cases covering functional, integration testing; identifying and resolving 45+ critical defects, resulting in 30% faster release and 98% business satisfaction.

PROJECTS

AIVADENT - AI-Enabled Clinical Support for Modern Dentistry 🔗

Jun 2023 – Dec 2023

- Built a Full-Stack dental appointment management system with React.js, Node.js, MongoDB, and Clerk, supporting user authentication, booking flow, admin dashboard and payment gateway.
- Integrated an AI Voice Agent to enable conversational appointment scheduling and real-time assistance for patients and along with instant feedback for the users.
- Implemented payment gateway, email verification, and automated invoices, improving user experience and operational efficiency.

Multi-Disease Diagnosis System using Clinical Data 🔗

Jan 2024 – Nov 2024

- Developed a Multi-Disease Diagnosis System using Flask (backend) and React (frontend) to predict conditions like diabetes, heart disease, parkinson's disease and kidney disease from patient health parameters.
- Trained multiple machine learning models (such as Logistic Regression and Random Forest) using real medical datasets, and saved them as .pkl or .sav files for real-time predictions via REST APIs.
- Integrated and deployed the complete application—React frontend and Flask backend on Vercel enabling secure, fast, and accurate disease prediction accessible through a web interface.

Vision-Based Cursor Navigation through Dynamic Mouse Gestures 🔗

Feb 2025 – Oct 2025

- Engineered a real-time vision-based cursor control system leveraging deep learning-driven gesture recognition to map dynamic hand movements into precise cursor trajectories with sub-50ms latency.
- Implemented advanced feature extraction pipelines using MediaPipe, OpenCV, and TensorFlow, integrating gesture classification, and Kalman filtering for noise reduction and smoother motion tracking.
- Optimized the gesture-to-cursor mapping algorithm through adaptive sensitivity tuning and temporal motion analysis, significantly improving accuracy, responsiveness, and user experience in non-contact interaction.

PRACTICE PROJECTS

• Portfolio Website 🔗

• AI - Powered Interview Preparation 🔗

• Expense Tracker 🔗

• Vampyrion-Eclipse (Game) 🔗

EDUCATION

Sardar Patel Institute of Technology

B.Tech in Computer Engineering CGPA - 7.55

2021 – 2025

Mumbai, India

ACHIEVEMENTS & CERTIFICATIONS

- Semi-Finalist at Tata Imagination Challenge 2024. 🔗
- Developing Soft Skills and Personality. 🔗
- Ultimate AWS Certified Cloud Practitioner 🔗
